

Name:

## Maps & Geography

**Directions:** On a blank sheet of paper, draw a map of a place, real or imaginary. The map should be drawn neatly and contain the following components. Feel free to use color as necessary to be clearer and more presentable.

**Requirements:**

1. Title of place
2. Scale – For example, 1 inch on the paper = 1 mile in real life
3. Map key/legend with at least 5 different symbols included
4. Longitude and latitude lines

Some ideas and suggestions:

1. Natural landscapes: parks, rivers, lakes, mountains, etc.
2. Paths for movement: roads, highways, airports, etc.
3. Important buildings: schools, restaurants, houses, gas stations etc.

Under the map, using longitude and latitude, give the location of at least 3 places.

For example, “The mountain is at 37°N, 70°W.”
